

Pushing On: A Post Apocalyptic EMP Survival Thriller (The EMP Book 3)

Two strangers. No electricity. Even less hope. When a massive cyber breach hits every U.S. hydroelectric station just as the Gulf Coast refineries are decimated by a volatile storm, the attack knocks out the nation's entire power supply, throwing America into a deadly new dark age in the blink of an eye. For Army veteran Cash Bishop, getting back to his family before it's too late to save them becomes a fight for survival in a race against time. His only ally? A brilliant energy scientist who may be the only person still alive with more things to be afraid of than the impending apocalypse. Dr. Hannah Carter doesn't know who's after her or when she became a target. But getting captured is not an option—not that she has many. Seems the stranger she meets on her dangerous cross-country trek is the only person she can trust now to help get her home. And keep her alive. With chaos escalating and the country on the brink of collapse, Cash and Hannah need to figure out who executed the attacks on the U.S. power grid, and why these people are so willing to kill him to get to her. The DEEP STATE DOWN Series - Hard Way Home - Dark Road Back New York Times bestselling author Christa Wick (writing as Dana Fraser) brings readers a high-octane grid-down survival thriller, recommended for post-apocalypse fiction fans of SM Anderson, Kyla Stone, Mark Goodwin and Grace Hamilton. Publisher's Note: Previously released as Long Haul Home (c) 2016, a serial trilogy (Blind Spot, Down Shift, and Dead Head), re-issued with edits and updates, but no storyline changes.

The world had fallen. The mostly vacant cities were silent now. For those who had not been turned or consumed, remote locations proved the best chance to live a while longer before the inevitable end landed its teeth marks on their flesh or its disease in their blood. To eat or be eaten was the last imperative of the once noble species. All the accoutrements of being the most civilized of creatures had faded away and the human beast had been returned to the savagery of the primordial forest. This was the truth everywhere in the world, except one place—a small island, forgotten before and after the fall, a place where the sun yet shined down onto hopeful souls, 117 souls, the children of the Eden Project, who lived all their days until now in a great, glass dome. They were the children of light, pure blooded, uninfected, but they all knew (down to the smallest among them) that these hours of eternal incandescence were numbered. They all knew, every moment they breathed, that their destinies awaited them outside the glass, where darkness forever reigned. NIGHT WITHOUT END (Book Two of The Eden Project) now available

The year is 2173. About ninety-five percent of the population is unemployed. Only the wealthy, the one percent own homes. The rest are living on the streets, or in churches that have been abandoned decades ago with the downfall of religion. Normal food is scarce. Instead, people feed on High-Energy Plankton Wafers, called Red Wafers, produced from red Plankton and other algae growing in seawater. Global warming killed off apple trees, strawberry bushes, and bumblebees. No one has seen a bird in

How far would you go to be free? Nick's group barely survived the last attack. Now they're holed up in the empty ski lodge to regroup, out of reach of the Denver gang. When three desperate strangers show up, Nick faces a tough decision. The wrong choice could risk their lives. Who would you trust? On the road to their new home, Daniel's mother Anne falls mysteriously ill. Fearing exposure to the deadly virus, the two must quarantine themselves in an empty town. Before long, they realize things in the desert town aren't what they appear. Getting home will be the hardest part. Food is running out. Winter is approaching. There's only one way out of the mountains, but it won't be easy. As Nick's group ventures closer to gang territory to get home, Mia gets closer to important answers about the virus. But will the truth about Hosta really matter if they don't survive long enough to get home? Fight to Be Free is Book 3 in a post-apocalyptic thriller series about people pushing past their limits as they try to survive the end of the world.

This book examines how contemporary women novelists have successfully transformed and rewritten the conventions of post-apocalyptic fiction. Since the dawn of the new millennium, there has been an outpouring of writing that depicts the end of the world as we know it, and women writers are no exception to this trend. However, the book argues that their fiction is distinctive. Contemporary women's work in this genre avoids conservatism, a nostalgic mourning for the past, and the focus on restoring what has been lost, aspects key to much male authored apocalyptic fiction. Instead, contemporary women writers show readers the ways in which patriarchy and neo-colonialism are intrinsically implicated in the disasters they envision, and offer qualified hope for a new beginning for society, culture and literature after an imagined apocalyptic event. Exploring science, nature and matter, the posthuman body, the maternal imaginary, time, narrative and history, literature and the word, and the post-secular, the book covers a wide variety of writers and addresses issues of nationality, race and ethnicity, as well as gender and sexuality.

Limited time discount: 0.99 until January 1st! Wildfire Chronicles is the acclaimed horror/science fiction series from K.R. Griffiths. This compilation collects volumes 1 to 4 in one bargain package. *** Panic (Volume 1) Michael Evans is only in rural St. Davids to maintain a low profile after his time spent as a city cop ended in disaster. The town is perfect for him: isolated. A tiny population. Virtually no crime. Until the night the strange canisters fall from the sky and the town priest starts killing people with his teeth. To Michael, the bloodbath looks like a murder case that the quiet town's two police officers can't possibly handle. But this isn't just a crime scene. And the priest is just the beginning... Shock (Volume 2) The team had been told it would be a straightforward mission: enter St. Davids, now little more than a ghost town, retrieve the target and return to base. Trouble is, the target is a man named Victor, and it looks like somebody else got to him first. And St. Davids is anything but a ghost town... Psychosis (Volume 3) Michael Evans, crippled survivor of the massacre at St. Davids, has only one goal left: to find his young daughter. And that means journeying north and discovering that during the five days he spent comatose in an underground bunker the world has changed dramatically. And worse, it's still changing. Struggling to come to terms with a world steeped in shocking violence and ever-present danger, Michael must adapt quickly to a new reality: the virus has already infected the population. But it isn't stopping there... Mutation (Volume 4) The only thing the survivors of the catastrophe in South Wales wanted was a safe place to ride out the apocalypse. The castle looked perfect: high walls and natural defenses that even the infection could not breach. The problem was that someone had beaten them to it. Someone who would stop at nothing to maintain control. Someone with a dark secret that could change everything... *** Tags: Zombie apocalypse, Zombies, Horror, Post-apocalyptic, Action, Dystopian, Series, Science Fiction, Thriller, Suspense, Wildfire Chronicles

Eisa McCarthy lives in Caliphate City under the control of the radical Islamic group, the Ghuraba. Seven years ago General Mohammad bin-Rasulullah defeated the United States in a ruthless betrayal and set up their worldwide Caliphate in the ruins of Washington, D.C. The Ghuraba's supreme holy leader, the Abu al-Ghuraba, claims Eisa's father gave him control of the U.S. nuclear arsenal, a claim bolstered by the smoldering ashes of many cities and her Syrian-born mother's testimony. But after her mother is accused of apostasy, she learns her father may not be the 'martyr' the Ghuraba claim. Do the Ghuraba really possess the launch codes for the ICBM missiles? Or did her father 'lock them out' as Colonel Everhart, the rebel commander, wants her to tell the world? If she fights, the Ghuraba will kill her little sister, but if she doesn't, eventually the Ghuraba will hack in and nuke them all. All Eisa has are a string of Muslim prayer beads and a pre-Islamic myth her father told her the night he disappeared. The fate of the world, and her little sister's life, hang in the balance as Eisa sorts through ancient myth, her Muslim faith, and what really happened the night the Ghuraba seized control.

When fifteen-year-old Dee is left at her grandpa's farm in rural Washington, she thinks life is over. She may be right. A high-tech electromagnetic pulse (EMP) attack destroys the country's power and communication grids, and sends the U.S. hurtling back to the Dark Ages. Can Dee learn to survive without the basics: electricity, clean water... even her cell phone? The chaos caused by the EMP isn't her only problem. A sinister plot by a corrupt official threatens Dee and all she holds dear. She will have to fight if she wants to survive in this hostile new world. Scott Bradbury prompts readers to consider what will happen and how to mentally and physically prepare. In his debut work of nonfiction, The Post-Apocalyptic Primer, he examines what life might look like after the end of the world and it's not as abysmal as some might fear. In ten chapters including: Assessing Your Existing Survival Skills, Civilization After the Fall of Civilization, and Eat, Drink, and Be Wary, Bradbury offers commonsense strategies that exponentially boost one's chances of a bright future. Among other Apocalyptic scenarios, he describes what one might expect after a seismic catastrophe, an ice age event, nuclear war, and alien invasion as well as the stages of disorder, which he breaks down into Instant, Coming Soon, and Slow-Burn events. Where someone lives makes a big difference, but besides new threats, there are also new careers, new hobbies, and a whole new adventure, the only trick is to be ready for it.

The worst is over. All that remains for the survivors hiding in the castle is to gather supplies to prevent starvation. It is a problem they believe they can solve without further loss of life. But there is another problem: the castle has come to the attention of somebody else. Somebody with strength in numbers. And among that number is a man who might just hold the key to destroying the Infected. A man supposed to be dead already... Nearly 1000 pages of thrills and apocalyptic science fiction. Grab the box set and save over 50% compared to buying the books individually. Interview with the Author Q - What makes the Zombies Are Human series special? An epidemic ravaging the human population. A world spiraling into chaos. People doing whatever it takes to survive. I've always been drawn to the post-apocalyptic genre and wrote Zombies Are Human with all of the end-of-the-world books I've loved in mind. Big epidemics and events that reinvent the world are so thrilling. I also love getting into some of the science, like the genetic engineering, that would make the situations plausible. Zombies Are Human gives you some of that classic Walking Dead zombie fare, but...without giving too much away...I guarantee you've never read a zombie series like this before. Smart. Dangerous. Gritty. With rip-your-heart-out intensity (literally and figuratively in some cases).

NEXT #1: AFTERBURN Five years after a devastating solar storm wipes out civilization and spawns a strange race of mutants, Rachel Wheeler and her misfit family must choose whether to hide away or fight to join other survivors. As their food supply dwindles in the military bunker they've occupied, radiation from abandoned nuclear plants is altering the world around them. Not only are the mutants building their own cities and weapons, the remaining dregs of the U.S. military are massing for an attack. As the environment decays, hostile new creatures crawl out from the crevices and up from the waterways to threaten them all. But as a half-mutant, Rachel's choice isn't as simple as mere survival—the mutant way of life might be more promising than anything humans could hope to restore. And Rachel's next decision could tear apart her family and the entire world. ----- "Always surprises and always entertains." - Jonathan Maberry, the Joe Ledger series "Like Stephen King, he summons serious scares." - Bentley Little, The Mailman "Nobody thrills like Nicholson does. Pushing On is book 3 of The EMP, a post-apocalyptic survival thriller series. It deals with real people fighting for their survival every inch of the way.

It happened just yesterday or perhaps the day before. The bombs were dropped. No one knew why. Maybe a political study was taken into careful consideration. Perhaps a research grant had been involved. A new plan to invigorate the stock market. Whatever the reason, due diligence was undoubtedly done and all aspects were carefully considered. Certainly the motion was passed around the senate a time or two. After all, an election was coming. And then they went ahead and did it. Every vestige of civilization was blown away, save for a few stubborn traces barnacled along the grim fringes of existence. Like say, maybe the Maritimes...

Reviews- "The first novel in Jake Bible's series Z-Burbia hooked me. What appeared to be a jokey take on zombie fiction quickly develops some great characters and story." -BoingBoing.net "For those still not convinced about the zombie genre, Z-Burbia is worth a read if only for its female characters: Jake Bible doesn't have time for vapid whimpering damsels in distress. Oh no. Bible's characters are thinking, acting, feisty sorts." -Lee Murray, Bram Stoker Award-winning novelist "5.0 out of 5 stars 100% Zombie - and more. Quick, strong, gory, exciting, explosive, non-stop action. The opening part of the book does warn there will be gore, which if you are reading a zombie apocalypse book should not be a shock. Mr. Bible delivers all these. BUT he also delivers believable characters with different reasons for doing what they do. A developing political structure rising out of the ashes of civilization - from the Home-Owners Association tyrant to the constant battle between urban-and-rural. Big battles and little battles - zombies being weaponized, and parents raising kids in the Z-hellscape to be responsible adults. The layers take this book to the next level." -Erin Penn, Vine Voice, amazon.com "I love my zombies and this series is by far my favorite. EXCERPT: FROM KIMBERLY BETHUNE TOMLINSON'S JOURNAL JUNE 19th, 2024 I'm glad you are reading this. It is a record of what we did when all the gods were dead. We live in the aftermath of the HEDV retrovirus outbreak. The effects of the virus were catastrophic. Billions died. Some people had immunity to the virus: the small percentage of the population that carried one abnormal copy of the hemoglobin gene, the gene that causes sickle cell disease. You see where I'm going, don't you? More people of color have survived, immune, than whites. The usual demographics of the US are now inverted. With the correlation of survival with darker skin color, it has become all race. It always was. Most white people were all right with this change. But you can guess who isn't. White supremacists. MAGA hat wearing, confederate flag waving, tiki torch bearing white people. You can guess why: their whole worldview has been flipped. Health, wealth, beauty—all that was attractive and desirable—is now associated with blackness. Poverty, illness, criminality, the breakdown of family and civility—these are white things now. And the supremacists—in full and utter denial that it is their obscure genetic connection to Africans that has granted them immunity—are apoplectic. They've declared war. They're out to exterminate all people of color. And thanks to their persistent lobbying efforts of the NRA to ensure semi-automatic rifles, high-capacity magazines, and bump stocks were never regulated (even while things such as cars, nasal decongestants, milk, and happy meals were), there are more guns left in America than people. Black people, their white allies, we knew it was time or organize, to save ourselves. So now it's wild west, Mad Max, Red Dawn, Hunger Games, Civil War II, whatever you want to call it. The apocalypse has come. God help us.

In a post apocalyptic future, earth has reverted to a low-tech system of kingdoms and female leadership, held together by an empress. One couple emerges, Darnel and his fierce wife Betty, who are called upon by the empress to escort her to the Mountain Of The Ancients to coronate a new empress who will take over the reins of power.

In this gripping sequel to the post-apocalypse action thriller HARD WAY HOME, the answers behind an onslaught of not-so-natural disasters only lead to more questions as a global depopulation conspiracy threatens Americans from right in their own back yard. Retired Army Colonel Thomas Sand returns to the U.S. during its darkest days, only to find the leaders left in government-puppeted by the deep state elite-want him dead. Between the threat assessment algorithm he developed before the apocalypse, and the fact that his wife Becca and stepdaughter Hannah are both brilliant scientists critical to the new world order, his family isn't short on enemies. And despite all his training to the contrary, his only duty now is to them and their safety. Unbeknownst to him, halfway down the coast, his wife is fighting to drag her fevered and battered body home with no means of communication, and only the help of a nameless stranger... Meanwhile, Dr. Hannah Carter, still traveling with the Army veteran who saved her life, discovers she may be the linchpin to destroying the dangerous shadow government that now controls what remains of the fast-crumbling U.S. But to do so, she must leave behind everyone she cares about and face off against the hidden puppet master pulling the strings from his bunker. Unbeknownst to her, Cash Bishop, her fearless companion turned ruthless protector, has followed her into the lion's den, no violence spared. His only light in their new broken world of neverending darkness, finding Hannah is a given. As is taking down the corrupt powers that destroyed his country once and for all... Welcome to the 3 Books To Know series, our idea is to help readers learn about fascinating topics through three essential and relevant books. These carefully selected works can be fiction, non-fiction, historical documents or even biographies. We will always select for you three great works to instigate your mind, this time the topic is: Post-Apocalyptic Fiction Jack London's book place in 2073, sixty years after an uncontrollable epidemic has depopulated the planet. A former English professor is one of the survivors and he travels with his grandsons. The teacher tells the grandchildren the story of how the plague spread and how the world was before the devastation. In After London a long forgotten catastrophe devastates Europe and returns cities to nature. Good news for nature, bad news for human survivors, who live in an almost medieval state. The inventor of modern science fiction, Mary Shelley, also describes a world ravaged by disease where human societies invade into a state of horror and barbarism. This is one of many books in the series 3 Books To Know. If you liked this book, look for the other titles in the series, we are sure you will like some of the topics.

"You talk to yourself a lot, don't you?" said Luna. Williams looked at her and finally smiled in spite of himself. "Or it just may be that he's really talking to me, and you just can't hear it." He tweaked her nose. "Yet. Either way, you need to eat something and get some sleep. We all do. We've got a big day ahead of us tomorrow." "Why a big day?" "Ank, camping gear," he said, and the dinosaur folded his front legs with a groan. "Because we're going to head out for Barley's in the morning." He loosed his bedroll from the supplies strapped to Ank's back and tossed it to her. "The place where the sounds on your radio come from. We've—we're searching for something. A place we call Tanelorn. And we think that might be it." "Tanelorn," she repeated. "What's that?" Williams rested his arms on the bundles of supplies, thinking about it. "I don't know, exactly. I reckon it's just a place someone feels drawn to ... even if they don't know why. A place where the homeless can find a home, maybe." He looked at the lights in the sky, the Alien Borealis, as

Ank called it, and wondered. "But it may be that it's something else—a kind of Omega Point. A place where all the colors of the spectrum meet, like a prism. And become focused into a single, burning light. Maybe that's what people mean when they talk about the power and the glory." He tugged on a rope, releasing a waterfall of pots and pans. "Meh. It's just something to keep us going." "Like a magnifying glass," she said, ignoring his last statement. He paused, thinking about it. "Like a magnifying glass," he agreed. Then he added, "Now, what'll it be? Beans or beans?"
